

Dear Municipal Officials,

On Wednesday April 21, 2010 Vision Appraisal Technology will commence field data collection on all commercial properties in the Town of Rye.

The data collectors are gathering information on the physical size, use, condition, etc. of structures in order to estimate value.

The data collectors are not trained building inspectors and are not familiar with state and local building, fire or zoning codes.

Vision Appraisal personnel will be identified by ID badges with their photo and a letter of introduction from this office. The ID badges identify the person as an employee of Vision Appraisal Technology of Northboro, MA. The badge provides the person's name, title, Sex , eye color, hair color and employee number.

Up to four employees of the company will be completing interior inspections of commercial property individually or in teams of two.

The inspection process will take several weeks to 2 months dependent upon field conditions.

Please advise appropriate local officials, police and other necessary personnel.

If you have any questions please contact me.

Mitchell
