

Camp update – Camp is filling up. Combining grades to open up available spaces. Pool spaces are a limitation. The goal is to eventually have separate camps. This would provide better quality. The lunch program is a success. It will provide quality lunch food for the campers. The lockers have been ordered for campers and staff. Waterfront cell phone lockers are also on order due to theft episodes in the past. The swim lessons are a go with the Town of Mamaroneck but are requiring an instructor. Yonkers will send people they suggest for instructors. Camp orientation will be taking place in the High School Auditorium.

Marine Center/Beach – Questions as to whether the beach can be open on the weekends prior to Memorial Day was discussed. It will be brought into consideration for next season. The Marine Center will have a soft opening on Memorial Day weekend. The official opening date is June 3. A new Preschool teacher will be replacing Kyle Troy. This person will additionally be a camp director this season.

Senior Programming – There is consideration of providing senior programming in the Blue Room when Zumba is not in session. Possibilities include senior exercise, Tai Chi, etc. *Silver Sneakers* has funding available to tap into for these types of programming. Columbus Park is a possibility to offer Tai Chi. Ideally, if three days per week were offered, this should suffice the need for senior programming. This is based on Sandy's experience of running 17 Senior Centers during her tenure in the city of Yonkers.

Dog Park update – Veteran's Park in Harrison uses fobs for entrance into the dog park there. There is a fee of \$20.00 which provides access to the dog park. Non-residents are charged \$50.00 per year. The suggestion would be have Sandy speak to a consultant look at the possibility of utilizing Stanley Park for a dog park design. Barry should also be involved in the process of consultation.

Parks update – Playground check-up – have Parks employees notice when the equipment is in need of repair. There should be a yearly certificate for inspection.

Sewer Treatment Plant – Parking in this area is a big problem. Parents are parking along the field and are blocking cars from exiting from the soccer games. It is especially a problem on the weekends. It needs to be addressed.

Meeting called to a close by Steve Scarangella at 8:26 P.M.

Next meeting: Thursday, September 21, 2017
