7:40PM VOM Tree Committee Minutes – October 17, 2022

Quorum!

Beverley Sherrid, Krishna Finkenberg, Sara Mignano, Gail Koller, Nora Lucas

No changes to accept last month's meeting minutes.

Comments from residents: None.

Correspondence

130 Beach questions regarding where and how we are planting trees

1505 Stoneybrook, tree permit to remove a dozen trees and now they are not replanting.

1311 Franklin permit denial repeal

Carroll – Jeff Langus (resident) distressed the removal of a large healthy trees (100 year old Linden, many others lost during large storm about 15 years ago.)

Old Business

Bare root trees planted this fall as the tree grows the roots grow in unconstrained way in comparison to the ball and burlap. This is one of many reasons bare root is being used now.

Robert Ingenito, works part time, might handle PR/ community outreach to notify the residents a tree will be removed. Similar to how a tree being planted is notified to the residents. Jerry's office can create a process to handle this outreach.

Last Spring (2022) 33 trees were planted, horrible drought followed and many residents proactively watered the trees. Great positive response and support!

Halstead new sidewalk grant proposal, bump outs, big project to cross Halstead, still in the design phase from Railroad to Harrison 4million dollar project with grant money. Beverley contacted Dan Sarnoff to include structural soil under the sidewalk so trees may grow. Trees might be only on the bump out. Gail says bump out obscures the sightline and sometimes trees get removed in the end.

James Barney maintenance, pruning & removal assessments, needs monthly request, not ad hoc; submitted as a spreadsheet. Notify Beverly (not Jerry or James) pruning and removal evaluation lists.

Oriente/ Sylvan lane tree? Gail will follow up if the tree remains and needs removal.

List of Village tree removals: Right of Way, Parks

Tree Permit Removal Application: 4 came in the last month

Tree removed on 10 Oaks Lane. Permit?

Can you navigate the Village website to see if your neighbor has filed a permit? What is the protocol for reporting tree removal? Someone tried to contacting VOM/ Jerry's office and no

one was available to take the call. What to do when a tree is about to come down and you are unsure there is a permit. Email Dennis/ Building Dept?

Approved permits should be public information/ transparent on the website. Robert and Sally handle the postings.

What is the process for putting together a process? Nora will follow up with Jerry.

Tree Law Update

Revisions due Wednesday morning. Beverly's August changes did not make it into the draft. Draft was circulated to Planning Board, which requested a couple of other changes.

October 12, 2021 Tree law implementation, just passed the one year anniversary!

Fall planting- new sites, Beverly originally had 280 sites, 40 responded saying they do or don't want trees. Some new sites added, now proposing 261.

Request to start a list of potential new tree locations. Constraints, 20 feet from the corner. If overhead wires exist, must be a small flowering tree, open space. Tree law was passed to plant beyond the right of way, with permission of owner. BROW and proposed scholarship to do this was challenged after law was passed, now waiting to hear opinion of State Attorney General. Parks to be planted: (12) Warren Ave Park (10) Florence Park (5) along Stanley Ave overlooking the park (12) Rockland Pocket overlooking Shelldrake where removing invasive and adding pollinators.

Stuart Tiekert sent Beverly a 3-page list of locations in Lester/ Washingtonville area, many productive spots for new trees, very helpful.

Committee for the Environment planning pollinator gardens at Fennimore and Prospect, native drought tolerant plantings and a tree will be setback, near the knee. Small tree because of wires.

Dog Park Committee – trees may be removed to create a dog park. Someone can represent tree committee in upcoming Dog Park Committee.

New Business

My Favorite Tree and Why

Review with Jerry if Rob can utilize time for community outreach.

MetroNorth has agreed to let VOM plant trees in front of retaining wall along Bishop. Stumps need to come out first, Jerry asking DPW to plan removal, plant trees after that.

Meeting adjourned at 9:06 pm.

Attachment 02
1505 Stoneybrook

On Oct 18, 2022, at 9:42 PM, hcmill29or@aol.com wrote:

We have complied with the requirement of planting 10 trees by Nov. for cutting down 10 dangerous trees (tree removal permit application (3/10/2022).

We wish to have our tree removal permit application (7/1/2022) processed so that we can remove the dangerous oak tree in the back of 1505 Stoneybrook Ave. A condition of this application of 7/1 was that the 10 tree planting requirement for the March application had to be completed.

Thank you.

Attachment 3
312 Bishop about VOM trees along MTA embankment

Hi Beverley,

First, thank you so much for letting me know the outcome as you said you would. I appreciate that! Secondly, this is terrific news. I'm so happy to hear this and I'm sure other home owners on Bishop will be pleased. That area has looked abandoned (weeds and littering) since the tree removal. We look forward to this! Thank you for the good news.

Joni Cinquemani

Beverley Sherrid
Joni Marie <joni530@yahoo.com>
Hi Joni,

I think you'll be interested to hear that I joined Jerry Barberio and other Village staff last week for a meeting with several MTA reps about planting evergreens along the MTA wall on Bishop.

The trees will be planted in front of the old stumps without removing the stumps, which evidently would risk the stability of the wall. Leaving the stumps is actually beneficial for the soil.

I don't have a time table for this project but it's a priority.

Please let me know if you have questions!

Beverley Sherrid
VOM Tree Committee

Attachment 4
1035 Continental View Regarding New Trees

Dear Village Officials,

It was a pleasant surprise to wake up seeing a DPW crew in front of Continental View, planting new trees.

I'm sure the Village receives a lot of emails with complaints. But, we would like to praise and thank Beverly (Arborist Committee) and Jeff Ahne and his crew (DPW) for living up to their words, when they said "The trees will be planted in the Fall". They did a great job enhancing the beauty of our neighborhood and the entrance (from Rye) into our Village.

We hope everyone has a very Happy Thanksgiving and again thank you.

Sincerely,
Bernie McNally (Resident/CVC Board)

Attachment 5
New Trees Along Prospect

Hi Gail and Beverly,

I can't tell you how happy we were to see all the new trees that were planted on Prospect in the last month!

They will look so beautiful in the next few years!

Thank you for keeping our village beautiful!

Have a wonderful holiday season.

Best wishes

Dorothee

Subject: Prospect Ave

Hello,

First and foremost, I commend you for replacing the beautiful oak tree which was cut down last year. I was very happy to see that a tree was planted next to where the former tree was.

I would like to point out that Prospect Ave between Sand Street and WJC would very much benefit with more trees on that block. We only have power lines on one side of the street so it would be perfect for the other side to get new shade trees.

Thank you in advance for your assistance in making our street more beautiful.

Best regards

Dorothee

Attachment 6
120 Osborn Ave Regarding Removing and Replacing Trees

Hi Jerry,

I was looking over the recently adopted tree law sent yesterday and noticed a possible solution that you hopefully find acceptable.

Can you allow us to contribute to the tree preservation fund the cost to replant 2 trees in a village park? From my understanding the village wants to plant multiple trees, let us help with that. Plus if you allow this, I still have to replant trees on my property. The net effect would be an increase in the tree canopy of the vom. 4 trees instead of 2.

The existing tree is too large and wide. With its branches it is not possible to build a reasonably sized house given the limited building envelope given set back requirements. If the lot was bigger I could and would.

This is a reasonable solution. The tree permit is the last thing my wife and I need for a building permit after months of different varying committees. Please work with me here.

Also what tree species would you find acceptable? You stated that the trees on my application were not.

Thanks,

Jarrett

Jerry,

How can you not approve to remove the tree? The house can't be built without that tree being removed? This is the issue.

What solution do you offer? You can't block the house being built for one tree as how the law is written. Isn't that correct Teresa?

Jarrett

On Wed, Nov 30, 2022 at 11:56 AM Jerry Barberio <jbarberio@vomny.org> wrote:

And that is the one of two trees on the application I will NOT approve to be removed. That was my discussion on site with the Chair of the Tree Committee.

Additionally, the number of trees and species will be directed in the partial approval letter AFTER the Tree Committee meeting discussion. The recommend replacement trees on the application are not appropriated species. I hope to discuss at the Tree Committee meeting which trees are permitted for replanted on the site.

Thanks Terresa. JB

Jarrett,

This is helpful. It appears that the previous owners sought subdivision approval for the lot on which you are proposing to build your house and as a condition of that subdivision approval you

had to go with your development plan for the new lot back to HCZMC for approval. No site plan approval was required from the Planning Board.

In light of this it is my opinion that you will need to follow the same path any other person seeking a building permit in the Town has to follow under the Tree Protection Law which is to go to Jerry and the Tree Committee.

I do note that the subdivision approval resolution speaks of a 60 foot tall pine tree that the applicants made a commitment to try and preserve.

Jerry, if you have any questions please let me know.

Thanks!

Dear Jerry and Jarrett,

The VOM Tree Protection Law provides that where site plan approval by the Planning Board is required for a project then the Planning Board ensures that the requirements of the Tree Protection Law are satisfied. If the plans were changed to move the driveway and that also had an impact on the trees to be removed then it seems to me that a site plan amendment may be necessary. If someone can send me the address of the property I can also look at the site plan approval that was presumably granted by the Planning Board.

Thanks!

Terresa

Subject: Re: Tree Removal Application

Hi,

Thanks for your reply. I'm confused by the second part. "I will not approve the entire list of trees you included which may result in the size of the structure permitted or where the driveway is built."

-- The land was subdivided. The only way a house could be built is with removal of x amount of trees. This was approved by the planning board before I purchased the lot

-- The harbor coastal engineer required that we move the driveway causing additional trees to be removed as part of the harbor coastal.

The law has a limit of 3 protected trees in a 36month period yes, but also has the caveat of land use board approval exclusions from my interpretation given you can't build a house without removing more than 3 trees. As long as we replant the same number of trees we remove I don't understand what the issue is.. Am I missing something? It wouldn't make sense for the town to approve a subdivision for the building of a one story house but then later not allow the house to be built because of trees.

Thank you,

Jarrett Williams

On Mon, Nov 28, 2022 at 4:05 PM Jerry Barberio <jbarberio@vomny.org> wrote:

If you want my determination without going to the Tree Committee, I can facilitate that, but once I provide it and you disagree, it will take longer during the appeal process.

To provide some advance, I will not approve the entire list of trees you included which may result in the size of the structure permitted or where the driveway is built. Those items will be discussed at the meeting on 12/19.

Thanks. JB

Subject: Re: Tree Removal Application

Hi,

Thanks for your email. Is going to the tree committee and waiting 3 weeks really necessary? My project has already been delayed x months with multiple other committees already. As per the website, if the trees were approved on a site plan approved by the planning board we are good to go. Almost all the trees we plan to remove were on the site plan approved back in 2018/2019. Then the harbor coastal committee that set me back multiple months requested we remove additional trees near the street to move the driveway slightly. We plan on replanting an appropriate number of trees as per the tree law. I'm trying to avoid another setback especially if this can only be done at a meeting that is 3 weeks away.

Thank you,

Jarrett Williams

Attachment 7
Carroll Ave – Trees coming down at RR Station

Jeffrey Langus <jefflangus@gmail.com>

Koller, Gail <GKoller@vomny.net>

Hello Gail and Beverly,

I hope you each had a lovely thanksgiving and that you are gearing up for more upcoming festive holidays.

In case you're not already aware, more trees are being chopped down.

This time it's at the Mamaroneck train station and in the adjoining Columbus Park.

Is this sanctioned by the village? Do they have a permit? Was the tree committee consulted or informed?

Observed conditions as of this morning at 8am:

- Several smaller trees along the fence line between the old station house and upper level parking were chopped down to their stumps, with no signs of rotting on the stumps.
- Several big old trees were marked with yellow tape around their trunks and limbs, in and around the station house and in Columbus Park itself, for example:
 - At the base of the ramp that leads from the lower parking into Columbus Park
 - Nearby the wooden pedestrian bridge that crosses the Sheldrake river
 - Along Station Plaza Rd
- Equipment I observed appeared to be in readiness for full tree removal, not for pruning:
 - Dump truck
 - Crane & bucket truck with tree chipper hitched to back
 - An 18 wheeler flatbed truck carrying skid steer truck.
 - At least 3 workmen

Last night, I stopped to ask men who were surveying the area what they were doing (as they were wearing hard hats and looking up at the trees). They said: "I'm not an arborist, but I think this tree looks like it has some rot."

Thank you in advance for addressing my questions and concerns.

Thanks,
Jeff

Hi Jeff,

Thank you so much for your email and your concern and caring about trees in the VOM!

Sadly, these removals were approved by the VOM due to safety reasons.

Best to you and your family,
Gail

Attachment 8
MetroNorth Removing Trees at MNR Station

Hi Beverley,

I hope things are well.
Saw this at train station this morning.

Why is metro north allowed to cut down whatever it wants? Why has Mamaroneck ceded control over it's own property?
It hurts my soul to see this. And all the tree destruction around town as well. Home owners killing trees because they just feel like it.

Sincerely,
Laura Horner.

Only trees with ribbons in my photos. They cannot be penalized by us for lack of maintenance. They should be reprimanded for lack of maintenance, but they do not work for me.

Thank you. I'm sorry its the best we could do to reduce and eliminate the target hazard.

Jerry Barberio

Hello,

Still don't understand why the Village was ok with this, inviolation of their own tree ordinance. Non diseased trees on a slope with a DBH of more than 3 and a half inches. This must be one of the trees that didn't matter according to Mr Barberio.
It's why I got confused and upset after he told me he approved 10 for removal and many, many more were taken down. He then qualified his earlier email.

The other picture is to show how well the "arborist " from Clear Cut Industries which specializes in deforestation did pruning on the ones that are left. Not left for long I'm guessing.

Do the beech trees by the train station have significant tree status?

Sincerely,
Laura Horner

Metro North is taking down every tree surrounding the Mamaroneck train station.
Mr Barberio seems to be okay with this.

I have explained everything to you in detail and I have provided pictures as well. I have also copied the Tree Committee.

Thank you again.

Subject: Re: MNR station/parking lot trees I will discuss at tree committee meeting

May I ask what is being planted in their place?

Does anyone consider the bird and animal life that used those trees?

What's going to maintain the slope? Concrete?

I wish the Invasive vines and Japanese knotweed infesting the village was being attacked with such vigor.

I'll send you the list we use. They will be planting 16 trees on their property as per our tree laws. Beverley will send the new tree list we require the tree permit users to consider since they are native and appropriate for our area.

Tree Committee -- Recommended Species for VOM Trees

REVISED 12/19/2022

<u>name</u>	<u>common name</u>	<u>Salt Type Soil</u>	<u>Salt Type Aerosol</u>	<u>Street/Park/ Both</u>	<u>Comments</u>
<u>Small Trees</u>					
cercis canadensis	eastern redbud	no		Both	shade tolerant
prunus virginiana "Shubert"	canada red select cherry				native
prunus serrulata	Kwanzan cherry	yes		Both	non-native
prunus sargentii	Sargent cherry	moderate		Both	non-native
amelanchier laevis	service berry	yes		Both	wide canopy
malus sugartyme	flowering crabapple	moderate		Both	recommended by Cornell
acer buergeranum	Trident Maple	yes	some	Both	
crataegus spp.	hawthorn	yes		Both	Washington hawthorn: thornless,
oxydendron arboreum	sourwood				shade tolerant, persistent fruit
halesia carolina	carolina silverbel				shady sites
cornus florida	flowering dogwood	no		Both	partially shade tolerant
cotinus obovatus	American smoketree				native
carpinus caroliniana	American hornbeam	no		Park	shade tolerant; good host plant
<u>Medium/Tall Trees</u>					
platanus acerfolia	London plane tree	yes	yes	Street	non-native, reserve for streets
nyssa sylvatica	tupelo/ black gum	yes	yes	Both	
Gleditsia triacanthos, thornless	honey locust "inermis", "Imperial"	yes	yes	Both	
acer rubrum	red maple	no		Both	
acer x freemanii	Freeman red maple				
Liquidambar styraciflua	sweet gum "Rotundifolia" seedless	moderate	yes	Both	
Tilia americana	linden/american basswood	no	no	Park	
tilia heterophylla	white basswood				
quercus alba	white oak	yes		Both	
quercus bicolor	swamp white oak	yes		Both	
quercus rubra	northern red oak	yes		Both	
quercus palustris	pin oak	no		Both	
quercus macrocarpa	bur oak				
quercus michauxii	swamp chestnut oak				
quercus phellos	willow oak				

quercus muehlenbergii	chinkapin oak					
quercus imbricaria	shingle oak					acidic, well-drained soil
quercus lyrata	overcup oak					
Prunus serotina	black cherry	yes	yes	Both		native, non-invasive in US
Juglans cinerea	white walnut	no		Park		
liriodendrom tulipifera	tulip tree			Park		
taxodium distichum	baldcypress					
gymnocladus dioicus (seedless)	Kentucky coffee tree (seedless)					
celtis occidentalis "Prairie"	hackberry					
ostrya virginiana	eastern hophornbeam					
cladrastis kentukea	yellowwood					
betula nigra	river birch					
maclura pomifera "white shield"	osage orange			Park		
<u>Do not use</u>						
cornus kousa	Kousa Dogwood					multi-stem; need heavy pruning
Ulmus Americana	Valley Forge Elm					weak branch structure
Acer platanoides	Norway maple					non-native, invasive, prevents
Pyrus calleryana/"bradford"	callery/bradford pear					native growth
