It is a WEEPING cherry.

Weeping trees grow OUT, not up, it will be into the street and sidewalk before you know it.

Chapter 296 prohibits residents from planting anything on public property.

If a resident wants to plant a tree on public property they can get a tree planting permit.

I believe the property owners should be given a violation, told if they move the tree to their property all is forgiven, told that the Village can plant a tree if they like or they can get a tree planting permit.

We have laws for good reasons, they should not be ignored or selectively enforced.

No, we certainly did not.

However, we have had a struggle getting Jefferson Ave residents to accept trees at all. I would rather keep this one than have an enraged resident and an empty space. It will be years before it's big enough to create a problem.

Thank you. I can almost say with certainty... we did not plant that little guy. I am consistently amazed.

I'll check on what we can do when I get back to NY tomorrow morning. Thx
