Subject: Re: Detrimental Pruning

Gail,

I don't have the address of this particular tree but is not the only one. I will try and create a list for your September meeting.

I would suggest that this is another reason to do an inventory of all trees planted over the last 10 years.

Sincerely,

Stuart Tiekert

Stuart:

Please give us the address where this tree is located so we may follow up. Thank you.

Gail

Dear Members of the Tree Committee,

Please see the attached photo of a pruned tree in the Village.

Please note the long stubs left.

The wounds will not heal properly and are detrimental to the tree.

Closer supervision to see that work is done properly is required to avoid this kind of damage to Village property.

Sincerely,

Stuart Tiekert
