All,

The maple taken down at 305 So. Barry was a VOM tree and the back side of the tree was decayed 10' up from the base. Please see the attached picture.

If you have any questions regarding the above, please do not hesitate to contact me at 914-777-7745.

I just don't recall that it was failing but I feel better at least it was the village. Chainsaws working in their backyard on their private property. Sorry for the alarm.

Hi Sarah,

Yes, I remember that fuss. I think the Sayles saved the tree for another five or six years. Last week I saw one of the DPW pink Dots of Doom on the base so I think it was probably removed by the Village.

Perhaps Tony, copied here, can confirm.

Hi everyone

there are (were) 3 large sugar maples in front of the old Sayer property--I think i have the name right-- the yellow house with gambrel roof. now there are two and I hear chain saws. Those trees were healthy I thought and definitely village trees--I made a big stink years ago when the Sayers were working on them and confirmed that although they are set way back, they are village trees.

Just wondering if you know anything about that situation.
